

## Product Information

PolyPrep is a solvent based product designed to interact with existing coatings such as polyurea, plastics, or synthetic rubber materials to accept a new application of polyurea. It is great when needind to tie-in or recoat existing polyureas after the recoat window has closed. This product can be brush or spray applied and will flash off and allow for recoat within an hour. Polyprep is a single component product that does not use aromatic halogenated or non-halogenated solvents to bond old polyurea to new polyurea.

## Packaging

**1 Gallon Container**  
**5 Gallon Container**

*Products are packaged by weight, so final package volume is a close estimation.*

## Limitations

This product contains Volatile Organic Compounds (VOC's) which may be released during and for some period after installation producing odors and affecting air quality. To avoid possible contamination of sensitive substances and for protection of human health, ensure proper air ventilation of work areas until odors completely dissipate.

## Physical Properties

Color	Clear
Specific Gravity	.94 @ 77F
Boiling Point	243 F
Flash Point	93 F
Odor	Amine Odor

The values stated in this data sheet are produced under controlled laboratory conditions.

## Product Use

### Applications

Apply at a rate of 200 to 700 square feet per gallon by brush or pump sprayer. Do not allow ponding on the surface. Small areas may be wiped down with a clean cotton rag. If coating surface is not tacky at time of recoating the window has passed, and re-application is necessary. PolyPrep must flash off/dissipate prior to reapplying a coating.

## Safety and Storage

For in-depth information on product safety and precautions, please review the product SDS sheets. Prior to using the product, ensure that you have the proper personal protection equipment (PPE) available. This includes but is not limited to the following items:

- Safety Glasses with a splash shield
